

Copia Capital Model Portfolios are now available on FE Transmission

13th March 2019 –Copia Capital is today pleased to announce that both its Select and Select Plus range of portfolios are now available on FE Transmission. Subscribers to FE will now be able to incorporate access to these ten Copia Capital portfolios into their research and reporting within FE Analytics.

FE Transmission is a service by FE that allows FE Analytics users to analyse their model portfolio data at a holdings level, conduct bespoke comparisons and create comprehensive portfolio reports and improve portfolio transparency.

Henry Cobbe, Head of Copia Capital Management: “Copia Capital is delighted to be providing detailed data on our portfolios to FE Transmission to enable adviser analytics and reporting. We trust the leading services of FE which enable advisers to compare and analyse DFM solutions and help them make objective investment decisions. We believe it's also a great opportunity for DFMs to better communicate with financial planners, exchanging more accurate and comprehensive information on portfolios through the tools provided by FE.”

Please visit the FE Transmission Directory in FE Analytics to request access or contact Copia Capital Management

Press Release

Copia Capital Management is the investment solutions division established in 2013 by Novia Financial plc to provide differentiated investment strategies for Advisers' clients both on and off the Novia platform.

For Advisers who have already understood the benefits of using a modern investment platform like Novia, Copia Capital Management gives access to the expertise of a Discretionary Fund Manager to provide an enhanced investment service to our mutual clients.
