#### Notes:

Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates.

The performance of each asset class is represented by relevant indices and expressed in GBP terms, which are selected by Copia Capital Management. Reference to a particular asset class does not represent a recommendation to seek exposure to that asset class. \*Maximum Return Drawdown is defined as the largest single drop from peak to trough of the value of an asset class or portfolio over any timeframe within the stated period. This information is included for comparison purposes for the period stated but is not an indicator of potential maximum loss for other periods or in the future. Past performance is not indicative of future performance.

Notes: Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates. Past performance is not indicative of future performance. Select Retirement Income Plus performance shown is purely that of the Copia models, which are designed to be used in conjunction with the Just holding.

# **copia:capital** Select Accumulation and Select ESG: outcome chart

Outcome (risk-return) analysis as of 29 November 2024

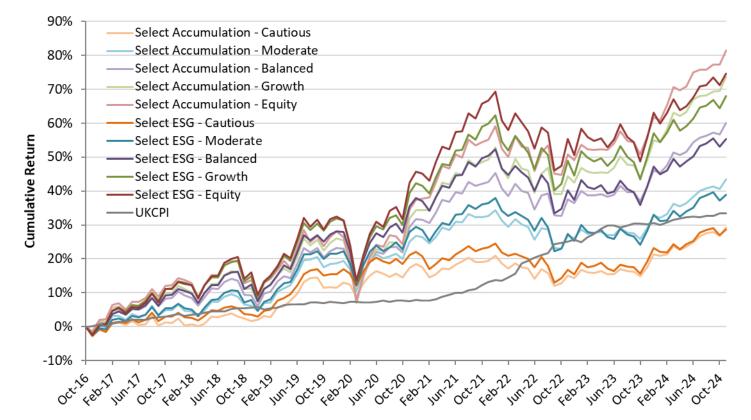

Our 'Select Accumulation' portfolio was previously known as 'Select'.

For illustration only.

Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates. Past performance is not indicative of future performance. The annualised risk and return figures are calculated based on a historic 5-year period as of 29-Nov-2024. The performance figures for Select ESG portfolios include simulated data before the inception date of the Select ESG portfolios (31-Mar-2020).

# **copia:capital** Select Accumulation and Select ESG: outcome chart

### Outcome (cumulative return) analysis as of 29 November 2024

#### Select Accumulation and Select ESG Cumulative Performance Since 31-Oct-2016

Our 'Select Accumulation' portfolio was previously known as 'Select'.

For illustration only.

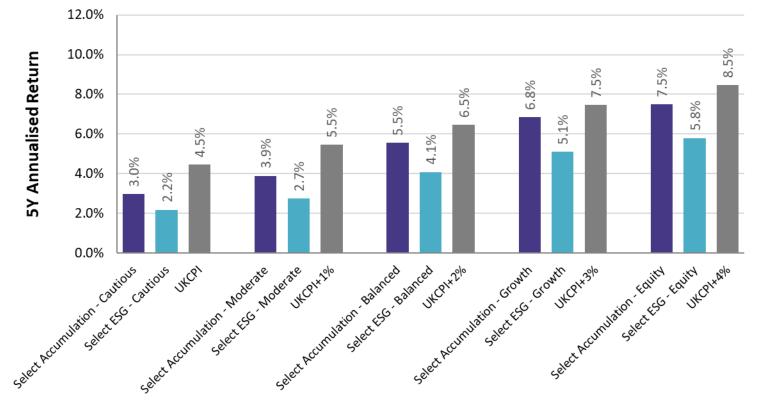

Returns based on Total return, assuming income is re-invested immediately and rebalanced on due dates.

Available CPI data has been used as a comparator for real returns. CPI data for Nov 2024 is currently unavailable and not shown. Past performance is not indicative of future performance. The cumulative returns are calculated based on the period from the inception date of the Select Accumulation portfolios (31-Oct-2016). The performance figures for Select ESG portfolios include simulated data before the inception date of the Select ESG portfolios (31-Mar-2020).

### Understanding the risks

Investment model portfolios may not be suitable for everyone
The value of funds can increase and decrease, past performance and historical data cannot guarantee future success
Investors may get back less than they originally invested
