Description

The **objective** of the Copia Select: Money Market portfolio is to provide a highly liquid, low risk portfolio, providing returns that closely track the Bank of England SONIA Compounded rate. Unlike its predecessor LIBOR, SONIA is based on actual average of the interest rates that banks pay to borrow sterling overnight from other financial institutions.

The **strategy** uses actively money market funds, carefully assessed and selected by Copia on an ongoing basis.

This **approach** may be compatible with the needs of retail or professional investors, or eligible counterparties, looking to preserve nominal capital, either as their sole investment strategy or an element of their investment portfolio.

Asset Mix**:

The model portfolio is managed by Copia Capital Management, the investment manager, to fulfil the model’s investment strategy and objectives. The investment manager may make changes to the investments held without notice. Clients are agreeing to the investment model as recommended by an Adviser and may not be investing into the specific assets included in this report. The portfolio report includes the assets held at the date published. The portfolio report will be updated and made available as soon as is practicable following a change made by the investment manager.

The value of investments can fall as well as rise and are not guaranteed. Clients may get back less than originally invested. Consideration should be given to whether it is felt that the outcome of any risk assessment is accurate and advice should be sought for factors such as investment objectives, the investment term, attitude to risk, capacity for investment loss and the level of inflation. Model portfolios may not be suitable for all investors.
